ABOUT ME !

Enthusiastic software development professional and full-stack developer with hands-on experience in building scalable, high-performance applications. Skilled in web technologies, system design, and backend engineering, with a strong passion for solving complex problems and continuous learning.

EDUCATION

- **MAHARSHI DAYANAND UNIVERSITY** , Rohtak-124001, Haryana (INDIA) 2020–2024 – B.Tech CSE
- **ST Anthony Inter College**, Pratapgarh 2019–2020 – 12th PCM
- **ST Anthony Inter College**, Pratapgarh 2017–2018 – 10th All Subject

TECHNICAL SKILLS

- HTML / CSS / JavaScript / React
- Java 8 / Maven / MySQL / JDBC
- OOP / System Design (HLD, LLD)
- Git / GitHub / GitLab CI/CD
- Docker / Ubuntu Linux / AI Prompt Engineering
- Google Spreadsheet APIs
- AWS / Azure / Bash Shell Scripting
- Kubernetes / Ansible / Terafoam

PROJECTS

- **Camera Management System** – Developed an AI-powered Camera Management System capable of handling 100+ live streams simultaneously using WebRTC, WebSocket, Python, and OpenCV, with integrated face recognition for automated monitoring. The system achieved low-latency real-time video handling, optimized backend scalability, and reduced manual surveillance effort by 60 percentages, demonstrating expertise in building large-scale, fault-tolerant, and AI-driven solutions.
- **Sorting Visualizer** – Built a Sorting Visualizer using HTML, CSS, React.js, and Java to demonstrate how different sorting algorithms work in real time. The interface allows users to select and observe algorithms like Bubble Sort, Merge Sort, Quick Sort, Heap Sort, Selection Sort, and Insertion Sort through smooth, animated transitions. React handles dynamic rendering, while Java powers the core logic behind the sorting processes.
- **Hospital Management System** – Developed a hospital management application using Java 8, JDBC, and MySQL to streamline patient records, appointments, and billing. Implemented secure authentication and role-based access, reducing unauthorized data access by 40% and improving query performance by 30% through optimized database indexing.

PROFESSIONAL EXPERIENCE

PRIMENET GLOBAL Pvt Ltd (Full Time)

Nov 2025 – Present

- Working as a Cloud Engineer specializing in AWS and Azure, I have managed multiple government projects involving Docker and Linux. My responsibilities include monitoring virtual machines, configuring EC2 backup jobs, implementing disaster recovery solutions, and automating workflows using Bash shell scripting.

Maruti Suzuki India Ltd. (Intern)

Jun – Jul 2025

- Implemented GitLab CI/CD pipelines to automate builds, testing, and deployments, reducing release cycle time by 25%. Contributed to DevOps strategy planning, aligning infrastructure with deployment efficiency goals, and participated in vendor meetings to adopt best practices for enterprise GitLab integration.

Q-Lencer (Intern)

Feb – May 2025

- Enhanced and deployed a responsive freelancer platform using React.js, integrating GSAP animations and AJAX for dynamic, real-time content updates. Leveraged Bootstrap for consistent styling and mobile-first responsiveness, while optimizing performance to reduce page load interruptions by 35%. Enhanced user experience through interactive UI components, resulting in improved navigation speed and increased client engagement across the platform.

Honeywell (Trainee)

Oct – Nov 2023

- Gained hands-on experience in Power BI, performing data cleaning, modeling, and transformation to convert raw datasets into actionable insights. Designed interactive dashboards that improved business reporting efficiency by 20% and enabled faster

decision-making across teams.

CERTIFICATIONS

ICT Academy, Honeywell – Completed hands-on training in Power BI, focusing on data modeling, cleaning, and transformation. Built interactive dashboards and analytical reports, enhancing the ability to convert raw datasets into actionable business intelligence.
